

FELINE GO KIT PREP GUIDE

CAT'S NAME: _____ DATE UPDATED: _____

COMMITMENT

Pets are part of the family. To keep them safe, you must commit to preparing in advance:

- Keep pets with you. Generally, the best place for your pets is wherever you are.
- Prepare a feline evacuation (Go) kit and refresh it annually

RELOCATION OPTIONS

If you and/or your pets need to evacuate your home, determine your options and gain approval from your friends, relatives, or other accommodation options. Plan alternatives. Pet-Friendly Emergency Shelters should be your last option. Disasters require you to be flexible with alternative plans.

FELINE GO KIT PREP GUIDE

GEAR

- Leash (6 feet ideal)
- Collar/harness
- Paw Protectors
- Restraint while traveling
- Favorite toys

HOUSING

- Plastic kennel or wire crate
- Food bowl or paper plates
- Water bowl
- Blanket or bedding

TIP: Use a waterproof storage container for your evacuation kits like a 5-gallon plastic bucket with lid or XLG Ziploc "Big Bags."

FOOD & WATER

- 7 Days of **dry cat food**

In general, a typical adult 9-10 pound cat will need about 1-2 pounds of food for a 7-day period. NOTE: Some experts recommend up to 14 days. These are estimates. You and your Veterinarian are the best to determine your pet's needs

MAKE COPIES OF THESE DOCUMENTS

It is **very important to PRINT & INSERT** the documents into a bag or attach them to this form. Store them for online access as well. Prepare both because cellphone coverage and electricity may not be available.

- Health and/or vaccination records
- Medical/behavioral instructions
- Photo to help prove ownership of pet
- Photo to identify pet if lost

SANITATION

- Cat litter, tray & scoop
- Trash bags
- Paper towels
- Newspaper
- Pet-safe disinfectant

FIRST AID KIT

Contents of a human first aid kit plus:

- Pet first aid booklet
- Vet Wrap bandages
- Oral syringe or turkey baster
- Dawn dishwashing detergent
- Styptic Powder
- Flea, tic, and parasite prevention
- 7-day supply of medications

- 7 Days of fresh **drinking water**

Typically, a healthy 9-10 pound cat will need from 1-2 gallons of water for a 7-day period. NOTE: These are estimates and your Veterinarian and you are the best to determine your pet's needs.

PLEASE KEEP EVACUATION KITS OUT OF REACH OF CHILDREN AND PETS
